

Carequality

With OP's Carequality integration, you instantly gain the ability to share patient information with **600,000+ providers**, **50,000+ clinics**, and **4,200+ hospitals**. With a quick on-demand search from the patient's chart in OP, you'll be able to preview clinical documentation and import the information you choose with the click of a button. This "at your fingertips" access gives you a more complete picture of the patient's health history and improves care coordination.

SEAMLESS DELIVERY OF ACTIONABLE DATA

Send and receive CDAs with discrete data elements to populate your patient's chart with information like allergies and medications.

IMPROVED CARE DELIVERY AND COORDINATION

Access to a more complete patient record will lead to an improvement in care coordination and reduce errors — a win-win for you and your patients!

REDUCED BURDEN OF ADMINISTRATIVE TASKS

Search for and pull the records you need into the patient's chart right away - no waiting, scanning, attaching, or filing needed.

Built on a Trust Framework, Carequality enables secure, compliant exchange of information without the need for costly individual point-to-point connections — sharing more than **300 million documents** each month!

ACHIEVE INFORMATION INDEPENDENCE

Healthier Clinical Outcomes

Access your patient's records from their other providers to gain a more comprehensive view of their overall health, improving care and reducing medical errors.

Less Manual Busywork

Pull records directly into the patient's chart in OP - no need to request records, scan documents, manually enter data, or jump through hoops logging into external sites or additional security validations.

Better Patient Relationships

Your patients don't have to worry about asking other providers for a CD or flash drive, or to send their data to you by fax or mail - you take care of it for them!

Improved Care Coordination

Seamlessly transmit information to and from other providers, improving coordination of care, especially for patients with more complex conditions.

Easy and Fast Access to Other Providers

Retrieve whatever you need directly from within OP - no need to spend time tracking down the multitude of providers where your patients are receiving care and manually adding their health information into your records.
