General Information

Question	Answer
What is pediatric benchmarking?	Pediatric benchmarking is a mechanism to evaluate and compare pediatric practice performance. It helps identify gaps, boost efficiency, and reduce risks by comparing pediatric practices locally, regionally, or nationally — as opposed to MGMA, which includes broad benchmarking based on all specialties.
Why is pediatric benchmarking important?	Pediatric benchmarking provides pediatric-specific insights that help practices make smarter, more profitable decisions. It allows practices to compare themselves to others in the same specialty, ensuring the data is relevant and actionable.

Features & Functionality

Question	Answer
What kind of metrics are available in pediatric benchmarking?	Currently, there are 13 KPIs available, spread across financial categories like accounts receivable, revenues, payments, and scheduling.
How are the metrics aggregated?	All metrics are aggregated and de-identified, meaning they are reported at the practice level rather than the patient level. This ensures privacy and provides a comprehensive view of the practice's performance.
Can I compare my practice to others in specific regions or with similar characteristics?	Yes, you can narrow the field of comparison by region, number of providers, and primary payer type. This allows you to see how your practice stacks up against similar practices.
What are deep dive visualizations?	Deep dives visualizations are hand-curated reports that provide detailed insights into specific metrics for your practice. They help

	answer questions about why your KPIs are what they are and what actions you can take to improve them.
How often are the metrics updated?	The metrics are updated daily, with a look-back period of 365 days. This ensures that the data is current and reflects the most recent performance of your practice.

Usage & Benefits

Question	Answer
How can pediatric benchmarking be used for strategic planning?	Pediatric benchmarking can be used to track KPIs, set goals, and make policies to improve practice performance. It provides objective financial performance targets and helps measure revenue cycle effectiveness.
Can pediatric benchmarking help in negotiating insurance contracts?	Yes, if your practice performs well across various KPIs, you can use pediatric benchmarking as leverage in negotiating insurance contracts, demonstrating your practice's efficiency and impact.
How can pediatric benchmarking assist in new doctor orientation?	It can be used to introduce new doctors to the practice's performance metrics, policies, and procedures, helping them understand the practice's standards and expectations.

Subscription & Updates

Question	Answer
Is pediatric benchmarking a subscription-based feature?	Yes, pediatric benchmarking is a subscription-based feature and works alongside OP's Practice Analytics. For specifics and cost details, please reach out to your account manager.
What is the roadmap for future updates?	Future updates will include more KPI metrics, diagnostic categories, expanded financial offerings, and functionality to track changes over time. Additionally, metrics will be reported at the individual provider level.
